SUMMARY

PHP Laravel Developer with 4+ years of experience building and maintaining backend systems for e-commerce and SaaS applications. Experienced in developing RESTful APIs, designing database structures, and integrating third-party services including payment gateways, shipping platforms, and webhooks. Hands-on experience with Laravel, MySQL, Vue.js, and microservices, with a focus on writing clean, maintainable code and delivering reliable solutions that meet business requirements.

WORK EXPERIENCE

Sourrcecube Technologies Pvt. Ltd.

Jun 2024 - Sep 2026

Full Stack Developer —Sourrcecube Technologies Pvt. Ltd.

- Develop and maintain a Laravel-based e-commerce platform with a Vue.js frontend, building RESTful APIs for customer and admin workflows and contributing to frontend features when required.
- Work on microservices for core e-commerce functionality such as orders, payments, and data synchronization, keeping services separated and easier to maintain and scale.
- Build webhook-based synchronization between WordPress/WooCommerce and a custom Laravel CRM to keep users, orders, and product data updated across both systems.
- Integrate and maintain payment gateways including Bambora, Paysafe, and Authorize.Net, along with Trustpilot email automation for post-purchase review requests.
- Work with Next.js and Node.js on newer application development tasks, gaining hands-on experience with modern JavaScript-based backend and frontend technologies.
- Work closely with frontend developers and product teams to understand requirements and implement backend solutions that support business workflows.

InfyOm Technologies

Jun 2023 - May 2024

Laravel Developer —InfyOm Technologies

- Delivered backend services for two SaaS products — a multi-tenant **Hospital Management System (HMS/HMS-SaaS)** and a real-time news platform — using modular **Laravel architecture**.
- Designed **relational databases and RESTful APIs** to support secure multi-hospital tenancy within the HMS-SaaS platform.
- Built **content personalization logic** for the real-time news platform, tailoring article delivery to individual user preferences.
- Collaborated with **product and QA teams** from development through deployment, ensuring reliability and usability across SaaS releases.

Loopcode Technology

Apr 2022 - May 2023

PHP Developer Intern —Loopcode Technology

- Trained in full-stack development using **HTML, CSS, JavaScript, jQuery, PHP, Laravel, Bootstrap, and Tailwind CSS** under senior developer mentorship.
- Built four practice applications — **e-commerce storefront, Tic-Tac-Toe, calculator, and to-do list** — along with a Laravel demo to develop production-ready development practices.

SKILLS

- **Languages:** PHP, JavaScript, SQL
- **Backend:** Laravel, Node.js, Microservices, MVC, Eloquent ORM, Laravel Sanctum, RESTful APIs, Webhooks, jQuery
- **Frontend:** Vue.js, Next.js, Blade, Bootstrap, Tailwind CSS, CSS3
- **Databases:** MySQL, PostgreSQL, Database Schema Design, Mongo DB
- **Payment & Shipping:** Stripe, Bambora, Paysafe, Authorize.Net, ShipStation, Teams Delivery
- **Integrations:** WooCommerce/WordPress, Trustpilot API
- **Tools & Practices:** Git, GitHub, GitLab, Postman, API Debugging

PROJECTS

E-Commerce Platform – Sourrcecube Technologies

- **Problem:** A WordPress/WooCommerce storefront lacked a centralized CRM and admin system, resulting in fragmented order, customer, and product data.
- **Solution:** Built a custom **Laravel CRM** with a Blade-based admin panel and **Vue.js** customer interface, integrating WooCommerce through REST APIs and webhooks. Refactored key backend functionality into microservices for better scalability and contributed to Vue.js frontend components.
- **Tech:** Laravel, Microservices, RESTful APIs, Vue.js, Blade, MySQL, WordPress/WooCommerce, Webhooks, Bambora, Paysafe, Authorize.Net, Trustpilot API.
- **Additional Work:** Developed and maintained **Leads Management** and **Conferences Management** functionality, supporting lead tracking, data management, conference-related workflows, and administrative operations.
- **Impact:** Centralized data across platforms, reduced manual order and product reconciliation, improved backend scalability, and automated post-purchase review requests.

Hospital Management System (HMS/HMS-SaaS) & News Platform – InfyOm Technologies

- **Problem:** Hospitals required configurable management software supporting both single-hospital and multi-tenant SaaS environments.
- **Solution:** Developed scalable **Laravel backends** using Eloquent ORM, RESTful APIs, and MySQL, supporting both standalone HMS and multi-hospital HMS-SaaS applications from a shared modular codebase.

EDUCATION

Lovely Professional University

Jul 2025 - – Present

Master of Computer Applications (MCA) – Computer Programming, Specific Applications

Sutex Bank College of Computer Application and Science

Oct 2020 - Apr 2023

Bachelor of Computer Application (BCA)
